

# Mobile access to **automatically synced contacts**

Thanks to the EBF Contacts app, your team can access business contacts easily, securely, and even offline while on the go - on iOS, iPadOS, and Android. Automatically synced and compatible with Teams, Siri, CarPlay, and more.

## Your specific benefits

Guessing phone numbers is a thing of the past; no more frustration from outdated contact information or synchronization issues.

### Automated Sync

- Address books such as GAL can be easily connected
- From different sources such as Exchange 365/On-Premise, your CRM system, CSV files, etc.
- Display with contact details such as name, profile picture, phone number, email address, location, and department
- Search based on the specified contact details

### Easy to Use

- Incoming calls are recognized without first saving them
- Identify spam calls, avoiding accepting them
- Contacts also available in Teams, Siri, & Co., and usable offline
- Secure and convenient password authentication, Face ID, or Touch ID

### High Security

- Encrypted storage of the contacts on the device, GDPR-compliant, no vulnerability due to intermediary servers
- No reading of contact data by other apps
- Usable integrated or separated from the native contacts app
- Easy administration via UEM System

**50,000+**

identified spam calls

# Why EBF Contacts impresses

- ✓ A wide variety of data sources can be connected - from CRM to GAL to CSV files
- ✓ Automated regular synchronization
- ✓ Controllable via UEM
- ✓ Offline access as well as use of Teams, Siri, and CarPlay
- ✓ Contact management and access GDPR-compliant
- ✓ EBF is ISO 27001 certified

## What customers say about EBF Contacts

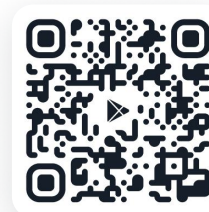

“EBF, our IT service provider, stands out for its high level of expertise and has been a reliable partner for years. Thanks to our long-standing collaboration, we are in the fortunate position of being able to submit product requests to EBF—two new features are currently being tested in Q&A, which, among other things, will enable contacts without email addresses to be deleted. We are eagerly awaiting these developments and look forward to the extended use of EBF Contacts.”

**Dirk Züchner**  
Head of IT Infrastructure at  
Richter+Frenzel
